

Title: **Cosmic Pet Reward Dep.**

Production Stage: Production

We offer: Co-Production

Synopsis:

Best friends Oyo and Indi decide to help inconsolable masters in search of their pets. It turns out that the rescuers themselves, as well as their new fosterlings, are rather strange. Simply because they are not from our Universe. After one of the first searches cosmo-dog Lok joined the team – he used to be the lost one himself, but it turned out he was quite intelligent and was declared a pet by mistake. In every new series the team tackles some new case, every new one is better than the previous! That's because the cosmo-pets seek for every opportunity to run away from their masters!

Since the friends do not want to return some of the lost ones to their old masters, they establish a zoo-hotel for them, where the wonderful foundlings could wait for a chance to meet their new masters (this new storyline provides for parallel action, funny sketches and memes).

Along with the search of disappeared knolle and brupsken, the friends start to look for Lok's native planet where his family remained behind. But it's not so simple – new and new obstacles appear in the way of the rescuers: galactic poachers, black holes and supernova explosions. However, the friends are ready to find all the lost ones, in this Galaxy, or even in the neighboring Universe!
